PROJECTS

Vampire WhatsApp V2

2 months, August 2018 to October 2018

A WhatsApp automation tool that can be used to send bulk messages over Socket IO, making my it easy to integrate with backend.

<https://github.com/saurass/VampireWhatsApp-V2>

College work automation portal

5 months, August 2017 to December 2017

Developed college portal (attendance, marks, student, feedback portal) using PHP framework laravel.

The project is on intranet in our college and has over 5000 users.

<https://github.com/saurass/College-Work-Automation>

Real time social network

1 month, July 2018 to August 2018

This project build on nodejs implies high use of socket io. The front end is built on angular 5 and for backend express js (a node js MVC framework) is used.

<https://github.com/saurass/Real-Time-Social-Network>

Peach PHP*15 days, 26 November to 10 December 2018*

A PHP mvc framework built for easy fast and secure development.

<https://github.com/peach-PHP/peach-PHP>

PHP-torrent*10 days, 5 December to 18 December 2018*

A peer to peer file sharing application just like torrent but working on http

<https://github.com/saurass/PHP-torrent>

GitHub

Some of my projects are on GitHub

<https://github.com/saurass>

**INDUSTRIAL
EXPOSURE**

Worked as an intern at hansmatrimony.com, involved in its dashboard development and real time problem solving. https://drive.google.com/open?id=1cUoSnEwbsZsyECmLZ10_aM45NdeiGZCb

INTERESTS

Open source enthusiast

Interested in writing blogs - <https://saurass.home.blog>

**PERSONAL
STRENGTHS**

Good at debugging and real time problem solving.

**PERSONAL
PROFILE**

Date of Birth : 04/09/1999

Nationality : Indian

Known Languages : English, Hindi

Hobby : Contributing to open source projects Like phpmyadmin
